WEATHER SYNOPSIS BY REGION

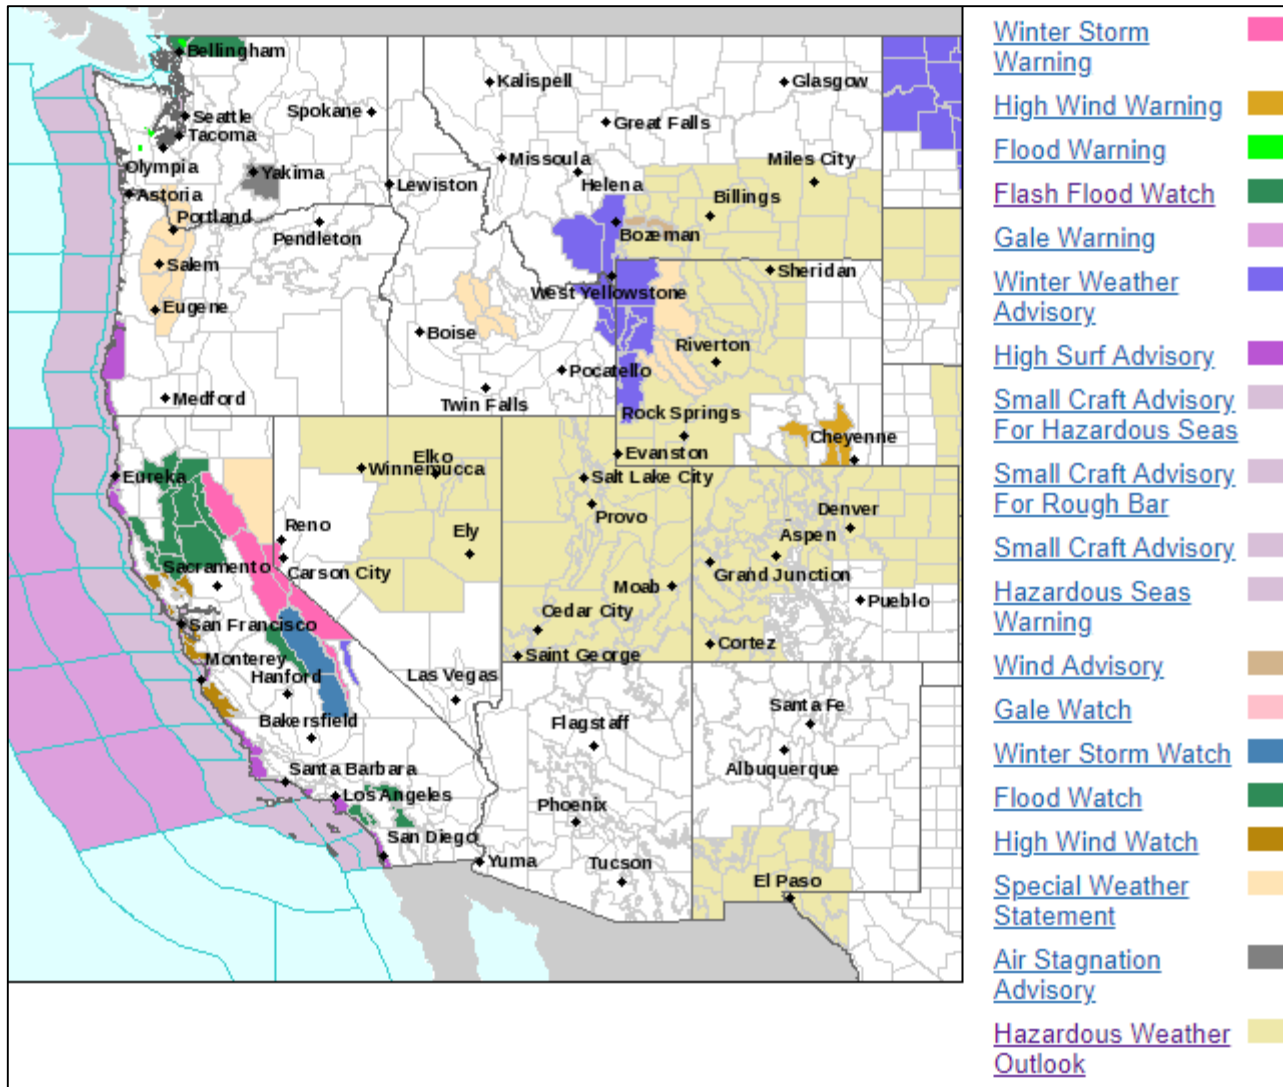

NORTHERN CALIFORNIA

- ***** Heavy Rain Could Lead to Debris Flows in Fire Scar Areas *****
- Pacific frontal system moving through the region today with gusty winds and moderate to locally heavy precipitation, and a repeat on Thursday. Scattered to numerous showers on Wednesday.
- SE-SW winds gusting to 30-40 mph in wind-prone areas today and Thursday.
- Snow levels generally 4,000-6,000 feet.
- A few isolated mountain showers Friday, followed by a stronger winter system with areas of heavy precipitation Saturday into Sunday. Snow levels will drop to 3,000-4,500 feet, and a bit lower Sunday. SE-SW wind gusts 30-40 mph Saturday.
- Cool and dry Monday-Tuesday with N-NE gusts 20-30 mph. A few light showers possible Wednesday.

• **SOUTHERN CALIFORNIA**

- A weak ridge of high pressure will remain over the region today. A couple of Pacific storms will move into the area tonight through this weekend. Another weak ridge of high pressure will build into California from the Pacific Ocean early next week.
- Temperatures will remain around 5 degrees above normal today, with mid 50s to mid 60s across the mountains and upper 60s and 70s in the valleys.
- Minimum humidity will be between 15% and 30% away from the coastal areas today.
- Periods of rain will spread into the far northern parts of Central California this evening and then spread across the rest of Central California Wednesday morning. Periods of rain will move into the northern parts of Southern California Wednesday evening and then reach San Diego County by Thursday morning.
- Most foothill and mountain locations will receive between 2 and 4 inches of rainfall and most coastal and valley locations will receive between 1 and 2 inches of rainfall through Thursday night.
- The snow level will start off around 8,000 feet and then drop to around 6,000 feet Thursday night.
- A few showers will be possible over the Sierra Friday, but for the most part Friday will be a dry day across the region.
- Showers will move across the area again this weekend, with most locations expected to receive between a quarter inch and an inch of rainfall.
- The snow level will be between 4,000 and 5,000 feet this weekend.
- Periods of south to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas this evening through this weekend.
- Significant cooling will take place Wednesday and Thursday. Temperatures will be around 10 degrees below normal Thursday through this weekend.
- Temperatures will warm a little, but still be below normal and humidity will lower early next week.
